

QGIS Application - Feature request #169

persistent layer properties

2006-07-04 08:17 AM - Redmine Admin

Status: Closed	
Priority: Low	
Assignee: Gary Sherman	
Category: Project Loading/Saving	
Pull Request or Patch supplied:	Resolution: duplicate
Easy fix?: No	Copied to github as #: 10228
Description	
<p>It would be very useful to have the possibility of saving layer properties even independently of projects; therefore different users or different projects could share uniform layer colours, transparency etc.</p> <p>GRASS implements a similar mechanism with RGB column in the database (which would be good to be able to reuse in QGIS). This, couples with the possibility of assigning properties to a bunch of layers (like a "catalog") would allow much smoother work.</p>

this seems the same as #3906. Better merge the two?

#2 - 2006-07-21 08:09 PM - shalasz -

- Resolution set to duplicate
- Status changed from Open to Closed

Resolving as duplicate of #3906.
