

QGIS Application - Bug report #16911

Spatial query plugin and disjoint operator is wrong

2017-07-21 04:14 PM - Etienne MORO

Status:	Closed	
Priority:	High	
Assignee:		
Category:	C++ plugins/Spatial Query	
Affected QGIS version:	2.18.11	Regression?: Yes
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: wontfix
Crashes QGIS or corrupts data:	No	Copied to github as #: 24810
Description		
<p>The result of a spatial query (using the spatial query plugin) with the operator 'disjoint' is wrong.</p> <p>For example, using the 2 SHP attached:</p> <p>COMMUNE disjoint CHEF_LIEU -> the result contains 2 COMMUNE with a CHEF_LIEU inside !</p> <p>This function work well without this bug in QGis 2.14</p>		

History

#1 - 2017-07-21 05:11 PM - Giovanni Manghi

- Operating System deleted (Windows 7, Windows 10)

Confirmed on Linux too.

#2 - 2017-07-25 07:44 PM - Giovanni Manghi

- Affected QGIS version changed from 2.18.10 to 2.18.11

#3 - 2017-11-02 12:34 PM - Alexander Bruy

Spatial Query plugin is not maintained. Use Processing (Select By Location, Extract By Location) instead, these algorithms much more flexible.

#4 - 2017-11-10 09:13 AM - Alexander Bruy

- Resolution set to wontfix

- Status changed from Open to Closed

Closed as "won't fix" because plugin removed from master and there is working alternative in Processing
