

QGIS Application - Bug report #16915

estimatedmetadata=true parameter on postgres datasource reports wrong number of features when filtering layer

2017-07-22 11:12 AM - Nikolay Lebedev

Status: Closed	
Priority: Normal	
Assignee:	
Category: Data Provider/PostGIS	
Affected QGIS version: 2.18.10	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: duplicate
Crashes QGIS or corrupts data:	Copied to github as #: 24814
Description	
<p>When postgres datasource has estimatedmetadata=true parameter, layer reports wrong number of features. This can be easily seen when setting provider filter and hitting "Test" button. Dialog will report total feature count instead of number of selected features.</p> <p>This also affects python api: layers with set filters have all datasource features instead of matching.</p>
