

QGIS Application - Feature request #16921

Composer Scale Bar needs more unit selections

2017-07-23 08:42 PM - Brian Wilson

Status: Closed	
Priority: Normal	
Assignee:	
Category: Map Composer/Printing	
Pull Request or Patch supplied:	Resolution: fixed/implemented
Easy fix?: No	Copied to github as #: 24820
Description	
The current units are Map units Meters Feet Nautical Miles	
It needs to have "kilometers" and "miles".	
Trying to use with a "label unit multiplier" results in useless garbage numbers (see screenshot).

Revision af59c535 - 2017-11-24 01:24 AM - Nyal Dawson

[layouts] Add more unit choices to scalebars

Explicitly add options for kilometers, miles, etc as the current UX for setting these is too confusing!

Fixes #16921

I agree it would be useful for a novice user be able to select the scale bar units in kilometers, although there is a workaround for this issue using a multiplier of 1,000.

- Status changed from Feedback to Open

Agreed - the extra units should be added to make things easier for users. I'll tackle this as part of the layouts rewrite.
