Crashes QGIS or corrupts data:	No	**Copied to github as #:**	24829	

Description

When adding WMS layers trough python plugin I run into issue with qgis stripping of vendor parameters. I found following issue that was cloesed (#12255). Proposed solution doesnt work for me "Ignore GetMap/GetTile URI reported in capabilities" as I am doing it from custom python script / plugin. Is there way to activate this setting from python script.

Is this a question or a bug report?

#2 - 2017-07-25 11:02 PM - Nejc Dougan

I guess both, not sure if it is feature or but, or am I just missing something. But non the less I am looking for work around.
