

QGIS Application - Feature request #16961

Add blending modes for layer groups

2017-08-02 10:36 PM - Johannes Kroeger

Status:	Open	Resolution: Copied to github as #: 24860
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>At the moment layer blending modes apply throughout all layers.</p> <p>It would be great if we could limit them to layer groups, so that an affect achieved by blending a certain group of layers would not further affect other layers.</p> <p>It would be great if we could also set one specific blending mode on the layer group itself.</p> <p>This would make the use of blending modes for styling much more versatile.</p>
