Is the server headless?

if yes see: <https://www.itopen.it/qgis-server-setup-notes/>

Thanks for advice, with Xfvb it works as should. Is it QGIS3 only specific requirement?

#3 - 2017-08-09 10:44 PM - dr -

- Resolution set to wontfix

- Status changed from Feedback to Closed

no, is also necessary for QGIS 2.* anytime you want to do GetPrints that include advanced symbology or text boxes with html content.
