<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 24919

### Description

The 64 bits version of QGIS 2.18 does not uninstall properly. Intall information is not removed from Windows registry. Example of consequence : It is not possible to reinstall QGIS 2.18 to another directory because even after uninstalling it and running the install again this message appear : "QGIS is already installed to your computer, click ok to reinstall or cancel"
