QGIS Application - Feature request #17054
importing/exporting to sld should use a rotation by field value if available

2017-08-24 10:31 AM - Paul van Genuchten

Status:	Open		
Priority:	Normal

Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	24953

Description

In qgis you can set a rotation for a symbol based on a attribute value (see screenshot).

This dynamic rotation is not exported to or imported from an SLD

I haven't checked but the same issue probably exists for setting symbol size based on an attribute value

History

Hi Paul, no attribute based symbology, of any kind, is supported in import/export. We have been looking for funding to support it, so far in vain :-)

#2 - 2017-10-14 11:06 AM - Andrea Aime

Also, this seems to be a (tiny) subset of larger ticket #15430
