

QGIS Application - Bug report #1706

Zoom to selected in attribute table only works if the layer is selected in the layers window

2009-05-19 06:18 AM - bjpfei -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Data Provider	
Affected QGIS version:		Regression?: No
Operating System:	RedHat	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11766
Description		
1.) open the attribute table of the layer A		
2.) select a row		
3.) now select in the layers window another layer then table A		
4.) Try the zoom to selected button in the attribute table - it doesn't work. Only if layer A is selected in the layers window it works. I think it should work in both cases.		
thx
