**Description**

Hello,

I've saved a project with with a layer on which it was active a query using the layer properties query builder.

Well, when I reopened the projects, the layer with the query appear no longer editable.

On the same layer I also used 4

'value map ' to enter the values in the fields.

Well, Even the previously setted 'values map' are not loaded on layer at project reopening.

**History**

**#1 - 2017-09-07 08:27 PM - Giovanni Manghi**

*- Subject changed from Trouble with query builder and values map in any shapefile in Qgis 2.18 to Trouble with value maps in any shapefile in QGIS 2.18*

*- Category changed from GUI to Vectors*

*- Status changed from Open to Feedback*

*- Priority changed from High to Normal*

*- Regression? changed from Yes to No*

Hi Antonio,

one issue one ticket please.

Anyway the first in not an issue, some datasources are not editable when a filter is applied.

About the second issue do you have any evidence is a regressions (it was ok on a previous QGIS release?).

Please add the data and detailed steps on how replicate.

thanks.

Hi Giovanni,

The data are not necessary because of the first 'issue' appens with all the shapefiles I've tried, then:

A user is able to edit a subset's database before saving the project but not after that.

Then the problem, in my opinion, is in saving project with a query on a shapefile

**#3 - 2017-09-07 10:36 PM - Antonio Viscomi**

Sorry For the second issue,

but I thought it was connected to the first one because in a project saved with the same shapefile 'not queried' vaulemap works fine.

Furthermore the shapefile remains not editable even I clean the previously saved query...

I see the problem with filtering editing, but I don't see (or understand) the problem with the value maps.

Can you add **steps** to replicate the issue? Thanks.

**#6 - 2017-09-09 03:24 PM - Antonio Viscomi**

Sorry,

The problem with valuemap is not existent,  I initially thought the cause of the problem with the filter was valuemap but evidently I was wrong about this.

many thanks Giovanni

and sorry for the misunderstanding I have created with valuemap
