

QGIS Application - Bug report #1712

Improper qgis shutdown corrupts GRASS vector layer

2009-05-22 11:03 AM - mir123 -

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>	Lorenzo Masini	
<b>Category:</b>	GRASS	
<b>Affected QGIS version:</b>		<b>Regression?:</b> No
<b>Operating System:</b> Debian		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> fixed
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 11772
<b>Description</b>		
<p>While editing a GRASS vector layer stored remotely on the network, I closed qgis without first going back to not editing the layer. It gave me a message along the lines of "expect a crash".</p> <p>Upon restart my layer was corrupted and qgis wouldn't open it. It turns out the topology file was missing, requiring a v.build from the GRASS command line to fix layer.</p> <p>Qgis should check for open layers in the GRASS plugin before closing!</p>
