QGIS Application - Bug report #1712
Improper qgis shutdown corrupts GRASS vector layer

2009-05-22 11:03 AM - mir123 -

Status:	Closed		
Priority:	Low		
Assignee:	Lorenzo Masini		
Category:	GRASS		
Affected QGIS version:		**Regression?:**	No
Operating System:	Debian	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	11772

Description

While editing a GRASS vector layer stored remotely on the network, I closed qgis without first going back to not editing the layer. It gave me a message along the lines of "expect a crash".

Upon restart my layer was corrupted and qgis wouldn't open it. It turns out the topology file was missing, requiring a v.build from the GRASS command line to fix layer.

Qgis should check for open layers in the GRASS plugin before closing!

History

#1 - 2009-07-27 09:23 AM - Lorenzo Masini

- Resolution set to fixed

- Status changed from Open to Closed

Fixed in commit:1e53f585 (SVN r11186).
