

QGIS Application - Bug report #17178

Import into PostGIS - Table to import to (leave blank to use layer name) - Missing parameter

2017-09-21 05:24 PM - Casper Bertelsen

Status: Closed	
Priority: Normal	
Assignee: Victor Olaya	
Category: Processing/QGIS	
Affected QGIS version: 2.18.10	Regression?: No
Operating System: Windows 10	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: invalid
Crashes QGIS or corrupts data: No	Copied to github as #: 25077

Description

If I try to use the algorithm **Import into PostGIS** and I leave the input **Table to import to (leave blank to use layer name)** blank, it won't let me run the algorithm and causes the field to flash yellow, saying missing parameter.

However if I just use a space in the field, it runs fine and the input table in my database gets the layer name.

History

#1 - 2017-09-22 10:03 AM - Giovanni Manghi

- Resolution set to invalid
- Status changed from Open to Closed

This was already fixed in more recent releases.
