

QGIS Application - Feature request #17189

Highlight snap feature

2017-09-25 08:48 AM - Bernhard Ströbl

Status:	Open	Resolution: Copied to github as #: 25088
Priority:	Normal	
Assignee:		
Category:	Digitising	
Pull Request or Patch supplied:	Not supplied	
Easy fix?:	No	
Description		
<p>When snapping is enabled currently only a potential snap point is highlighted but not the feature this point belongs to. When snapping is enabled for several or all layers it is sonetimes hard to decide if the highlighted node belongs to the particular feature one wants to be snapped.</p> <p>Proposed solution: Highlight node and its feature when snapping is possible (not if snap mode is <i>active layer</i>).</p>
