QGIS Application - Feature request #17215
Better error reporting within Expressions

2017-09-28 12:43 PM - Tim Hancock

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	Expressions		
Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	25114

Description

This is not strictly a bug report. More it is a request to improve the error reporting within Expressions. When an Expression fails, the Expression will stop without providing any details of the error (or that it has stopped). If the details of the error can be provided in some manner, it would greatly assist in debugging. An example would be a type conversion failure when trying to assign a float to an int.

History

#1 - 2017-09-28 01:11 PM - Giovanni Manghi

- Subject changed from Error reporting within Expressions to Better error reporting within Expressions

- Tracker changed from Bug report to Feature request
