<b>Description</b>	
<p>Currently it is not possible to create an empty Geopackage DB. One can only create a new layer in a (new or existing) Geopackage DB. There are cases where I don't want to create a new layer. I only want to create an empty Geopackage, so that I can later, e.g., import a bunch of shapefiles into it.</p> <p>Of course, I can create a geopackage layer and delete it later, but this is not super intuitive for the users</p> <p>Discussion here: <a href="https://lists.osgeo.org/pipermail/qgis-user/2017-September/040774.html">https://lists.osgeo.org/pipermail/qgis-user/2017-September/040774.html</a></p> <p>General call for features regarding support of Geopackage: <a href="https://docs.google.com/document/d/1xp36eR0DYThpTCNsWUam5JhFKVjOVpmRObwWSPjkrbc/edit#">https://docs.google.com/document/d/1xp36eR0DYThpTCNsWUam5JhFKVjOVpmRObwWSPjkrbc/edit#</a></p>
