QGIS Application - Feature request #1724
Cursor in the legend for a layer drag

Pull Request or Patch supplied:			**Resolution:**	fixed
Easy fix?:	No		**Copied to github as #:**	11784

Description

When I drag an item layer on any symbology item the cursor turns to forbidden, but after that, if I move the cursor (with an item layer to drag) on other item layers I'm still getting the forbidden cursor, instead of the [[SizeVer]] one. It would seems I couldn't move the item layer but when I release the mouse the canvas reflects the new layers order.
