

QGIS Application - Bug report #17259

QGIS3 New node tool lack the ability to add or remove vertices from the current selection

2017-10-08 10:05 PM - Dominique Lyszczarz

Status: Closed	
Priority: High	
Assignee:	
Category: Digitising	
Affected QGIS version: master	Regression?: Yes
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: fixed/implemented
Crashes QGIS or corrupts data: No	Copied to github as #: 25157
Description	
With the new node tool it's possible to select multiple vertices by drawing a rectangle but its not possible to add or remove vertices from the current selection by maintaining ctrl or shift key and drawing another rectangle. Old node tool has this feature.

[needs-docs] Allow adding and remove nodes from node tool selection

Holding shift while clicking and dragging adds nodes to selection,
holding ctrl removes nodes from selection.

Additionally, this commit:

- fixes the current 'select node but don't start moving' shortcut, but changes it from ctrl-click on a node to shift-click on a node (since it's 'adding' to the selection)
- makes ctrl-click on a single node remove just that node from the selection

Fixes #17259
