Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 25172
Description		
<p>In QGIS 2.18 there is an option to wrap text based on a certain character. There is no option to access expression builder or make the text wrap after a certain number of characters.</p> <p>Ideally there would be an option to auto wrap text based on the size of the legend box.</p> <p>https://gis.stackexchange.com/questions/253295/auto-wrap-legend-text-based-on-character-count/253397?noredirect=1#comment40836_253397</p>
