

QGIS Application - Feature request #17378

Settings migration can only rename groups, not change the grouping

2017-11-01 11:41 PM - Borys Jurgiel

Status:	Open	Resolution: Copied to github as #: 25275
Priority:	Normal	
Assignee:	Nathan Woodrow

Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>The settings migration can rename groups like in your example:</p> <p>Qgis/connections-xyz/*;/qgis/connections-xyz/*</p> <p>however, it fails to change the grouping depth, e.g.:</p> <p>Qgis/connections-xyz/*;/qgis/connections/xyz/*</p> <p>In this case it replaces connection names with parameters of first (or last) connection.</p> <p>It's important if we're going to reduce the number of main sections.</p> <p>PS. It's just an example, I'm not messing with the connections ;)</p>
