| <p>After installing Qgis 2.18 on Ubuntu 17.10, I am having difficulty reading the tooltips. The foreground/background colors have too low of contrast (see attached image). This makes it nearly impossible to determine what the buttons do.</p> |              |                                       |
