<b>Description</b>		
<p>If I hover the the different icon sizes in the Options menu, the icons change size as expected. But if I move away the cursor from a value that was not previously selected, the icons keep the size from the hovered value. This size also stays that way when I select cancel in the menu.</p> <p>The size setting is not saved. When I close QGIS and reopen it, everything is back OK.</p> <p>Tested in Windows (OSGeo4W) and on Ubuntu.</p>
