<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 25293
<b>Description</b>	
<p>Many maps have a space between the graticule frame and the map. It would be really useful to have this as a configurable option in QGIS Composer.</p> <p>If there is a gap, it would be nice to then have more options for labelling - outside the frame, inside the map, inside the frame etc.</p> <p>In my case I am trying to emulate South African topographic maps, example attached or full image at <a href="http://i.imgur.com/UmlUPVA.jpg">http://i.imgur.com/UmlUPVA.jpg</a></p>
