

QGIS Application - Bug report #1744

Crash when I save an edited postgis layer

2009-06-23 04:14 AM - Horst Düster

Status:	Closed	
Priority:	Low	
Assignee:	Jürgen Fischer	
Category:	Data Provider	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11804
Description		
<p>Since r10863 QGIS crashes when I try to save an edited postgis layer. The changeset from r10862 to r10863 shows that there were made some changes at the qgsdatapovider.</p> <ol style="list-style-type: none">1. Load Postgis Layer2. Toggle editing mode3. Make some edits4. Toggle editing mode and click save5. => QGIS crash

I edit regularly and didn't have any crashes. Can you give more detail about the layers you edit and/or the editing you do?

And are you sure the problem appeared with commit:3e01e6d3 (SVN r10864)? The changes therein shouldn't affect normal editing. It should only add more options when adding new attributes/columns to a layer/table.

And are you sure the problem appeared with commit:3e01e6d3 (SVN r10864)? The changes therein shouldn't affect normal editing. It should only add more options when adding new attributes/columns to a layer/table.

Yes I'm shure. I updated qgis source with svn up -commit:d8b93214 (SVN r10863) and everything works fine. When I update with svn up -commit:3e01e6d3 (SVN r10864) QGIS crashes (for further information take a look at the attached file).

All types of layers (Point, Linestring, Polygon) leads to crash.

#3 - 2009-06-23 05:37 AM - Jürgen Fischer

- Resolution set to fixed
- Status changed from Open to Closed

fixed in commit:f76f8a94 (SVN r10970)

#4 - 2009-06-23 05:55 AM - Horst Düster

Yes now it works! Thank you very much.
