

QGIS Application - Bug report #17441

Autogenerated relation names result in very large dialogs

2017-11-10 09:48 AM - Tim Sutton

Status: Closed	
Priority: Normal

Category: Edit widget	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 25338

Description

If you discover relations, QGIS creates a very long unique name for them:

relations.png

This causes the attributes form UI to get expanded horizontally and very awkward to use:

properties.png

Also the names are so long they are hard to recognise one from the other. Perhaps we could use the relation name rather than its ID in the layer properties attribute form UI?

Revision ea5ed674 - 2017-11-14 08:44 PM - David

Autogenerated relation names in dialog instead of ids

The autogenerated ids are quite long and this leads that they where very uncomfortable to use in the configuration of relation reference in the attribute type widget of layer properties - attribute form. So now the names are used in the combo instead of the ids. This effects only the GUI.

Fix: #17441
