QGIS Application - Bug report #17451
Plugin Manager truncates Plugin name in Lists

2017-11-14 10:29 AM - Richard Duivenvoorde

Status:	Closed			
Priority:	Normal			
Assignee:	Borys Jurgiel			
Category:	Plugin Manager			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:		**Copied to github as #:**	25348	

Description

In current Plugin Manager, the names of plugins with (too?) long titles are truncated to 32 chars it seems:

OpenQuake Integrated Risk Modelling Toolkit

becomes

OpenQuake Integrated Risk Modell

INSPIRE Nederland plugin voor QGIS

becomes

INSPIRE Nederland plugin voor QG

Not sure what the best solution is:

Make column in Plugin Manager wider (easiest)

or

Let plugin site check for width of title and create error when longer then xxx characters?

- Status changed from Open to Closed

Applied in changeset commit:qgis|5f915a09db20267e2ec3e30cd2bf6c9ba7fcd9b2.

#2 - 2017-11-14 12:37 PM - Borys Jurgiel

I don't remember why I implemented the truncation (maybe just to avoid a narrow column with a few items much longer than the rest?). Now I reverted it in 3.0 and 2.18 and everything seems to work - the list view is not expanding automatically and the contents even looks quite good.
