

QGIS Application - Bug report #17463

Inconsistent behaviour of the preview frame in Data-defined size legend in Diagram properties

2017-11-14 04:54 PM - Harrissou Santanna

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	Diagrams	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 25360
Description Vector layer properties --> Diagrams --> Rendering --> Legend entries for diagram size (you need to use a compatible diagram such as pie chart, with variable size) Select the Separated legend items Click one of the items shown in the preview frame, if nothing happens click another one, and then and then. (sometimes, one click is enough) At some point the different items you clicked on are merged to show a unique rectangular band in the preview frame, with no values shown. Also note that the title disappeared.
