

QGIS Application - Bug report #17464

Preview in Data-defined size legend dialog doesn't scale symbols size when separated legend items options is selected

2017-11-14 04:55 PM - Harrissou Santanna

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	Diagrams	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 25361
Description		
<p>In Vector Layer Properties dialog --> Diagrams, set a pie chart diagram and add your fields</p> <p>In the Size tab, set a variable size in order to enable in the Rendering tab, the "legend entries for diagram size" button</p> <p>Click the legend entries button and open the Data-defined size legend</p> <p>Select the "Separated legend items"</p> <p>In the preview section the symbols are displayed as a square symbol.</p> <p>I think the user would expect to see them the way they would be displayed in the legend, with real proportions and vertically aligned.</p>
