

# QGIS Application - Feature request #175

## query builder for shapefiles and other data

2006-07-06 03:40 AM - Redmine Admin

<b>Status:</b> Closed	
<b>Priority:</b> Low	
<b>Assignee:</b> Gary Sherman	
<b>Category:</b> Data Provider	
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> fixed
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 10234
<b>Description</b>	
query builder works only with postgis data; it would be useful to have it for all vectors, or at least with shapefiles	

### History

#### #1 - 2007-11-04 07:33 PM - Gary Sherman

- Status changed from Open to Closed
- Resolution set to fixed

Present since 0.8.x

#### #2 - 2007-11-05 04:51 AM - Martin Dobias

Not really true - query builder can be used so far only to do searching in attribute table. I guess this request was meant to support filtering the features of the layer.

#### #3 - 2007-11-08 08:58 AM - leo-lami -

- Status changed from Closed to Feedback
- Resolution deleted (fixed)

If you open the property windows of a shape or a GRASS vector and you select the 'General' label you see that the 'Query builder' bottom is not active. If you work with a [[PostGis]] vector it works.

#### #4 - 2008-03-19 07:41 AM - leolami -

The view select of feautres does'nt work with shapes and GRASS vector.

#### #5 - 2009-10-31 10:44 AM - Paolo Cavallini

- Resolution set to fixed
- Status changed from Feedback to Closed

Fixed in current trunk. See also #2036
