Revision b2c396fd - 2017-11-27 05:00 AM - Nathan Woodrow

Fix #17510 - Better scoping of QgsProjectionSelectionDialog inside QgsProjectionSelectionWidget

History

#1 - 2017-11-21 06:08 PM - Giovanni Manghi

- Category changed from Actions to Unknown

- Status changed from Open to Feedback

- Priority changed from Normal to High

Is the crash replicable or is was random event? have you tried on a clean install (i.e. removing the .qgis2 folder)?

#2 - 2017-11-22 07:24 AM - Nathan Woodrow

qgis2 folder isn't used anymore remember. It's in the profiles folder now. Make a new profile and see if you get the crash there. Settings -> User Profile -> New

Can you also install the qgis-dev-pdb symbols when running osgeo4w that will give you a better stack trace.

#3 - 2017-11-22 07:32 AM - Nathan Woodrow

This sounds like a plugin issue I found the other day. Do you happen to have LatLongTools installed?

#4 - 2017-11-23 06:17 PM - Giovanni Manghi

sorry, habits are hard to change!

#5 - 2017-11-27 05:52 AM - Anonymous

- Status changed from Feedback to Closed

- % Done changed from 0 to 100

Applied in changeset commit:qgis|b2c396fdfdfd52bb119e049d327d3b165d1e3d2c.

#6 - 2017-11-27 08:49 AM - Giovanni Manghi

- Resolution set to fixed/implemented
