

QGIS Application - Bug report #17550

Opacity slider in the Layers Panel partially broken for WMS and XYZ layers

2017-11-25 02:28 PM - Borys Jurgiel

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Map Legend		
Affected QGIS version:	master	Regression?:	No
Operating System:		Easy fix?:	No
Pull Request or Patch supplied:	No	Resolution:	duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #:	25447
Description			
<p>The opacity slider for a WMS or XYZ layer it not showed in the legend immediately after added. You need to dag the layer item up or down in order to refresh the panel's gui and see the slider.</p> <p>Steps to reproduce (in both 2.18 and 2.99):</p> <ol style="list-style-type: none">1. Load a WMS or XYZ layer2. Add the Opacity Slider (in Layer properties -> Legend)3. No slider is displayed (although the vertical scrollbar seems to notice the legend height change)4. Drag the layer down a bit to trigger gui refresh5. The slider magically appears <p>Please note both layer types (unlike other layers) have the fold-down triangle visible all the time. So I suspect the layer item doesn't notice the child widget list change.</p>
