

## QGIS Application - Feature request #17557

### Add up/down controls to Min/Max fields in the styling panel for raster layers

2017-11-26 05:41 PM - Johannes Kroeger

<b>Status:</b> Open	
<b>Priority:</b> Normal

<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 25454
<b>Description</b>	
<p>While most/all other such fields in the Layer Styling panel have up/down controls for their numeric input fields, the Raster styling Min and Max inputs are missing those.</p> <p>They can be very useful on systems with hovering the input with the mouse and then turning the scroll wheel, changes the values.</p> <p>I also see no harm in adding them to the "additional nodata value" input. Might be useful for some users.</p>
