<b>Description</b>		
<p>When there is only one row shown on attribute table, "Update All" / "Update Filtered" / "Update Selected" button click event doesn't trigger attribute table refresh. Corresponding column gets updated behind the scene, but not shown.</p> <p>affected version: OSGeo4W-qgis-dev-2.18.14-13</p>		

History

#1 - 2017-11-26 08:33 PM - Giovanni Manghi

- Affected QGIS version changed from master to 2.18.14

#2 - 2017-11-28 12:32 AM - Giovanni Manghi

- Status changed from Open to Feedback

Still valid in 2.18.14-16 (as available now in osgeo4w)?

#3 - 2017-11-29 03:37 PM - sand thorn

Version: 2.18.14-16

Platform: Windows 10 64 bit

If the corresponding layer has more than 1 row, all 3 buttons (Update All/ Update Filtered/ Update Selected) are working now even though the attribute table is showing only 1 row through filtering or selection.

If the corresponding layer has only 1 row, all 3 buttons do not trigger refresh.

All issues seem fixed since 2.18.15-1.

You may close this.

Thank you.
