

QGIS Application - Bug report #17570

Crash when using 3D model for point layer

2017-11-27 11:37 PM - Nadiia Gorash

Status: Closed	
Priority: High	
Assignee: Martin Dobias	
Category: 3D	
Affected QGIS version: master	Regression?: No
Operating System: windows 7	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: no timely feedback
Crashes QGIS or corrupts data: Yes	Copied to github as #: 25467

Description

User Feedback

Tried to use 3D Map . WMS layer, DEM and point shp file have been prior added to the project.
The 3D model was selected for point dataset.

QGIS crashed when I opened new 3D map window.

Report Details

Crash ID: 7dd7cadc2bb2115f5b1de1a0f456e708127226d7

Stack Trace

```
Qt3DRender::QUrlHelper::urlToLocalFileOrQrc :  
Qt3DCore::QAbstractAspectPrivate::createBackendNode :  
Qt3DCore::QAbstractAspectPrivate::sceneNodeAdded :  
Qt3DCore::QChangeArbiter::distributeQueueChanges :  
Qt3DCore::QChangeArbiter::syncChanges :  
Qt3DCore::QAspectManager::exec :  
Qt3DCore::QAspectManager::unregisterAspect :  
QThread::start :  
BaseThreadInitThunk :  
RtlUserThreadStart :
```

QGIS Info

QGIS Version: 2.99.0-Master
QGIS code revision: commit:82644fb37f
Compiled against Qt: 5.9.2
Running against Qt: 5.9.2
Compiled against GDAL: 2.2.2
Running against GDAL: 2.2.2

System Info

CPU Type: x86_64
Kernel Type: winnt
Kernel Version: 6.1.7601

Hi, sorry I can't attached the data used as it exceeds allowed limit, so uploaded it here <https://we.tl/LiGJ5LKbZH>

Thanks for the data, but so far I was unable to replicate the crash. You mention that you have used a 3D model for the points layer - I have not seen any such file in the attached ZIP file. Would it be possible to attach it? From the stack trace I think the crash could have been related to the 3D model file.

It would be also very helpful if you attach your QGIS project file with all the data loaded and configured (saved before you open 3D view).

- File 3d test.qgs added

Hi Martin,

i've attached QGIS project file and a 3d model i tried to use, i've also made a windows prs recording to illustrate what i'm doing.

This time the crash happened when i tried to select a model after 3DMap window was open.

This looks like upstream bug in Qt. I have reported it here: <https://bugreports.qt.io/browse/QTBUG-64916>

I think right now it is not safe to use "3D Model" option with more than just a few points in the layer.

Also please note that your 3D model (.skp file) is not supported by Qt 3D from what I can tell - you will need to export it to one of the formats supported by assimp library - see http://assimp.org/main_features_formats.html - e.g. Collada (.dae) or Wavefront Object (.obj) are known to work fine.

- Subject changed from 3D Map crash to Crash when using 3D model for point layer

#8 - 2018-11-08 01:28 PM - Giovanni Manghi

- Status changed from Open to Feedback

Please try on QGIS 3.4.1, if the issue is still valid change the affected version, thanks.
