

QGIS Application - Bug report #17587

New features with primary key and autoincrement field can not saved in a spatialite database in QGIS master

2017-11-29 09:48 PM - Gerhard Spieles

Status: Closed	
Priority: High	
Assignee:	
Category: Data Provider/SpatialLite	
Affected QGIS version: master	Regression?: Yes
Operating System: win 10	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	Copied to github as #: 25484
Description	
<p>After digitizing a new feature in a spatialite based layer, qgis opens the form to enter the data. The field "pkuid" (defined in the db as primary key and autoincrement) contains "NULL" and the save button is grey. You can only activate the save button, if you manually makes an entry in this field. This is not "autoincrement".</p> <p>In 2.18.14, this works correct. In the form, the "pkuid" field is blank and the save button ist aktiv. Press the save button and spatialite db gives the autoincrement number automaticaly.</p>	

History

#1 - 2017-11-30 04:41 AM - Giovanni Manghi

- Regression? changed from No to Yes

#2 - 2017-12-13 06:49 AM - Mathieu Pellerin - nIRV

- Resolution set to fixed/implemented

- Status changed from Open to Closed

Fixed in commit:73674e8157925df6979485cf36804c6e252d03a1
