QGIS Application - Bug report #17636
QGIS crashes when a layer is removed while loading the attribute table

2017-12-05 06:13 PM - Alexandre Neto

Status:	Closed			
Priority:	High			
Assignee:	Alessandro Pasotti			
Category:	Attribute table			
Affected QGIS version:	2.18.14	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	25533	

Description

If you try to remove a layer while it's attribute table is still loading. QGIS Crashes.

To replicate:

- Get a layer with lots of features, and load it in QGIS
- Open the attribute table
- While it is still openning, remove the layer from the Layers panel.

I got this with a 1.5 Gb CSV from Geonames.
