

QGIS Application - Bug report #17671

Processing: use selected only for vector layer inputs

2017-12-11 03:50 PM - Andreas Neumann

Status: Closed	
Priority: High	
Assignee: Victor Olaya	
Category: Processing/GUI	
Affected QGIS version: master	Regression?: Yes
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	Copied to github as #: 25568
Description	
<p>In processing, when one uses "Feature source" as input, there is a checkbox to restrict processing to use selected features only.</p> <p>When using "Vector layer" as an input, this checkbox is missing.</p> <p>It is a regression, since in the older QGIS version, this version was available as a global option (through Options --> Processing settings). Now this option is gone.</p> <p>Not sure if this is a Processing/GUI or Processing/core issue or both?</p>
