

QGIS Application - Feature request #17677

Ability to place labels below features

2017-12-11 11:15 PM - Nikolay Lebedev

Status:	Open	Resolution: Copied to github as #: 25574
Priority:	Normal	
Assignee:		
Category:	Labelling	
Pull Request or Patch supplied:	Supplied:	
Easy fix?:	No	
Description		
<p>Add an ability to render labels beneath features of subsequent layers.</p> <p>This technique is often used in administrative maps etc. so it'd be of use to many qgis users imho.</p> <p>Right now a workaround is by having two or more overlapping maps in a composer, but that's hardly convenient and doesn't work for qgis server maps.</p> <p>This checkbox (Render labels on a layer level) could sit nicely beside label priority slider in label options dialog:)</p>

BTW MapInfo had this feature from earlier versions.
