

QGIS Application - Bug report #17708

Custom SVG styles paths saved as absolute not relative

2017-12-17 10:55 AM - Patrick Dunford

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	Symbology	
Affected QGIS version:	master	Regression?: No
Operating System:	Debian 9	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 25605
Description		
<p>This seems to be just happening in more recent masters</p> <p>When you export out styles to a file then the SVG path is stored as the full path not a relative path</p> <p>This makes no sense when the custom SVG file used for the style happens to be in the same path as the style xml file.</p>
