

QGIS Application - Bug report #17717

Atlas export resolution not linked to world file

2017-12-18 02:45 PM - Vedran Stojnovic

Status: Closed	
Priority: Normal	
Assignee:	
Category: Map Composer/Printing	
Affected QGIS version: master	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: fixed/implemented
Crashes QGIS or corrupts data: No	Copied to github as #: 25613

Description

Atlas export resolution is not linked to export of world file.

If user changes export resolution when exporting atlas as images and "Save world file" option is checked, QGIS will create world file for every atlas image but with dpi settings set in Composition properties, not the one user entered in "Image export options" dialog.
