QGIS Application - Bug report #17724
Crash on clicking ADD in Virtual Layer dialogue without defining a layer

2017-12-19 05:55 PM - Ross McDonald

Status:	Closed		
Priority:	High		
Assignee:	Alessandro Pasotti		
Category:	Data Source Manager		
Affected QGIS version:	master	**Regression?:**	Yes
Operating System:	Windows 7 enterprise 64 bit	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	25620

Description

In latest master (19/12/2017) QGIS crashes if I click the Add button on the dialogue box without defining a virtual layer. In other Add Data dialogues the Add button is disabled until a layer is selected.

[bugfix] Fix crash in virtual layers dlg when adding

Fixes #17724 Crash on clicking ADD in Virtual Layer
dialogue without defining a layer

A proper implementation should handle the Add button
state when a virtual layer definition is available.

History

#1 - 2017-12-19 06:01 PM - Harrissou Santanna

- Regression? changed from No to Yes

- Priority changed from Normal to High

I can confirm. It was reported in #17489 (and was fixed !?)
