

QGIS Application - Bug report #17736

Chained filters crash QGIS when switching between ui tabs

2017-12-21 01:57 PM - Tudor Bărăscu

Status: Closed	
Priority: High	
Assignee: Matthias Kuhn	
Category: Relations	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: fixed/implemented
Crashes QGIS or corrupts data: Yes	Copied to github as #: 25632
Description	
chain_relation_bug.gif	
For a relation with chained filters and custom ui, switching between tabs like in the above gif crashes QGIS Master with the following debug output:	
Fatal: ASSERT failure in QList<T>::at: "index out of range", file /usr/include/x86_64-linux-gnu/qt5/QtCore/qlist.h, line 541	
I've attached a demo project, steps to reproduce the bug:	
<ul style="list-style-type: none">- Open the form of the pipe- Switch to the second tab- Switch back to the first tab and the issue is reproduced	
The issue disappears when disabling the chain filter option.
