QGIS Application - Bug report #17736
Chained filters crash QGIS when switching between ui tabs

2017-12-21 01:57 PM - Tudor Bărăscu

Status:	Closed			
Priority:	High			
Assignee:	Matthias Kuhn			
Category:	Relations			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	25632	

Description

chain_relation_bug.gif

For a relation with chained filters and custom ui, switching between tabs like in the above gif crashes QGIS Master with the following debug output:

    Fatal: ASSERT failure in QList<T>::at: "index out of range", file /usr/include/x86_64-linux-gnu/qt5/QtCore/qlist.h, line 541

I've attached a demo project, steps to reproduce the bug:

- Open the form of the pipe
- Switch to the second tab
- Switch back to the first tab and the issue is reproduced

The issue disappears when disabling the chain filter option.
