Revision 7ffc148e - 2018-03-06 12:27 AM - Nyall Dawson

[oracle] Fix provider

The oracle provider is quite broken on 3.0 for tables which require a feature id map.

This is due to QMap<QVariant,...> not working correctly when the keys are QVariantLists on Qt5. We had a similar issue with the postgres provider which was resolved by changing the map to always use QVariantLists.

Apply the same fix to oracle.

Fixes #18289, #16869, #17738
