

QGIS Application - Bug report #17751

Attribute table overwrites ids when selecting in search mode

2017-12-27 10:59 AM - David Signer

Status: Closed	
Priority: High	
Assignee: David Signer	
Category: Attribute table	
Affected QGIS version: master	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: fixed/implemented
Crashes QGIS or corrupts data: Yes	Copied to github as #: 25647
Description	
When selecting an attribute in the search mode of the attribute table (Ctrl F) the value is overwritten. https://user-images.githubusercontent.com/28384354/34377691-6c18986c-eaf2-11e7-84dd-a4fc385a1120.gif	

History

#1 - 2017-12-27 02:52 PM - Saber Razmjooei

- Subject changed from *Attributetable overwrite of ids when selecting in search mode* to *Attribute table overwrites ids when selecting in search mode*

#2 - 2018-01-03 09:19 AM - David Signer

For the change to the search mode we could just reset the values on change like we do it in the SingleEditMode. But we have to save them (because of change from single edit mode (when changed some field values)) to search mode.

But actually there is more than that. We got similar problems when switching from SingleEditMode to MultiEditMode:

<https://user-images.githubusercontent.com/28384354/34513051-716f8f86-f066-11e7-844f-968b6c78ab49.gif>

Or to the SearchMode when in MultiEditMode:

#3 - 2018-01-13 01:27 PM - Denis Rouzaud

- Crashes QGIS or corrupts data changed from *No* to *Yes*

- Priority changed from *Normal* to *High*

#4 - 2018-11-08 01:28 PM - Giovanni Manghi

- Status changed from *Open* to *Feedback*

Please try on QGIS 3.4.1, if the issue is still valid change the affected version, thanks.

This should be fixed with <https://github.com/qgis/QGIS/pull/8299> I don't know why it has been still open. Should I close it manually?

#6 - 2018-11-08 02:38 PM - Giovanni Manghi

- Resolution set to fixed/implemented

- Status changed from Feedback to Closed
