Easy fix?:	No	Resolution:	
		Copied to github as #:	25665

Description

In previous qgis versions there were "spreadsheet layers" module, with wich user could add xls and ods files, reading them as attribute tables. This could be a very useful feature!

History

But you can open them directly in QGIS either by Add vector layer button or by drag and drop. Virtual layers SQL are available for all open layers in TOC.
