

QGIS Application - Bug report #17777

Text goes over itself in text areas on display that has different display scaling than the main display.

2018-01-03 12:33 PM - Lauri Kajan

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	master	Regression?: No
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 25673
Description		
<p>Text is unreadable in textboxes for example on expression dialog or python console. Characters go over each other and cursor is located in wrong place (see image).</p> <p>This happens when qgis is used on a display that has different display scaling than main display.</p> <p>My main display has scaling 100% and the external monitor has 150%.</p>
