Crashes QGIS or corrupts data:	No	**Copied to github as #:**	25679

Description

On macOS whenever I use the new font dialog (e.g. in composer), the focus returns to the main QGIS window instead of the composer window. This is really going to confuse people especially new users. I don't know if this is a Mac only issue or also happens on other platforms.

See https://github.com/qgis/QGIS/pull/5966#issuecomment-355085980 for a small animated gif illustrating the issue.
