

QGIS Application - Bug report #17788

QGIS 2.99 - crash when applying extrusion symbology to 3d view

2018-01-04 03:36 PM - Umberto Minora

Status: Closed	
Priority: Normal	
Assignee:	
Category: 3D	
Affected QGIS version: master	Regression?: No
Operating System: windows 10	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: duplicate
Crashes QGIS or corrupts data: Yes	Copied to github as #: 25684

Description

Trying to get a 3d view with the new dev version.

In the layer properties of a polygonal shapefile, I enter the 3d Map menu, activate 3d rendering and set the parameters extrusion to a numeric field, altitude clamping to terrain, click to apply and QGIS crashes.

Attached is the shapefile I am using.

My version is in italian.

The report is below.
